PROFESSIONAL EXPERIENCE

TOO LOST, REMOTE

New York, United States

Software Engineer

MAR 2023 - Present

- Played a pivotal role in driving company growth through successful development and scaling of infrastructure to accommodate a growing user base and workload demands. Led efforts to enhance user experience and engagement by implementing new features and design improvements, resulting in a **50%** increase in user satisfaction metrics and doubling of revenue within **a year**.
- Actively collaborated with cross-functional teams, fostering strong teamwork and enabling efficient communication for streamlined project delivery. Demonstrated commitment to continuous improvement by staying updated with industry trends, resulting in an optimized codebase.
- Continuously improved software performance and user experience by adopting new tools and methods, resulting in a more reliable and user-friendly platform, appreciated by our artists and label partners.
- Promoted ahead of schedule due to strong performance and significant impact on company growth, demonstrating adaptability and continuous learning.

KILROY BLOCKCHAIN, REMOTE

Texas, United States

MEAN Stack Developer

JUL 2022 - FEB 2023

- Demonstrated mastery of the MEAN Stack and front-end development principles to craft engaging user interfaces and seamless experiences. Employed Nest.js to architect and implement robust server-side solutions, ensuring optimal performance and scalability across projects.
- Strong understanding of front-end development principles, including HTML, CSS, and JavaScript, and expertise in building responsive and user-friendly interfaces with modern UI frameworks such as Angular or React.
- Consistently delivered top-notch code following coding standards. Worked closely with blockchain specialists to develop scalable APIs and backend systems for blockchain-integrated solutions, ensuring on-time project deliveries.
- Key projects: FLO Forms Workflow, CASEY for Behavior Interventions

ALPHA TECH, ONSITE

Hetauda, Nepal

Full Stack Developer

DEC 2019 - JUN 2022

- Proficient in developing robust web applications using Laravel and Vue.js, leveraging extensive experience in PHP and JavaScript. Led the completion of over 10 projects, contributing to a significant revenue increase, including achieving a **5X** growth in revenue for key clients.
- Demonstrated expertise in third-party APIs and cloud-based solutions, ensuring high code quality and adherence to industry best practices with scalability in mind. Regularly reviewed code from fellow developers, fostering a culture of continuous improvement and innovation.
- Developed Android applications using Flutter framework, showcasing versatility in mobile development technologies and contributing to the company's diverse project portfolio.
- Key projects: Document and report management app for Nepal Electricity Authority (NEA), Hetauda, outsourced projects such as BatchDriven, NYC Runs, Stripper Fans, and Securious, showcasing adaptability across diverse industries and technologies.

EDUCATION

TRIBHUVAN UNIVERSITY, NEPAL

Bachelors of Science in Computer Science and Information Technology

APR 2018 - OCT 2022

ADDITIONAL INFORMATION

- Technical Skills: Proficient in PHP, JavaScript (including Node.js), Python, AWS, Docker, SQL, and NoSQL databases. Experienced in backend frameworks such as Laravel and Nest.js, and proficient in frontend frameworks including Vue.js, Angular.js, and React.js.
- Achievements: BIC Hackathon 2.0, Farm2Door
